LETTER OF INTENT

Lenovo is using CloudLabs platform very often during the training and believes that further work on the intensifying this platform are highly recommended. In our opinion as a strong features should be mentioned:

1. Ease to manage laboratories for short time events.

2. Ease to training groups of employees from different branches of the company.

3. Access to the full computing environment for all the time from different devices.

During such events our employees are very happy with using CloudLabs – it is easy to manage and there is no problem with using it even on private computers. That's why we highly recommend using CloudLabs for commercial use.

With regards

Krzysztof Rozanka
Strategic Alliance Manager
